Software developer	
It was an internship but it was an course structure type internship I haven't been placed in a project but still i created a django based project on my internship which boosted my internship period in a healthy way	

PROJECTS

Encryption in defense system	Sep 2025 – Sep 2025
I have created an project in my 2year third semester which i have done backend using flask and frontend using JavaScript and and react	
Out projects main goal is to encrypt the most confidential file for transmission between the denfense forces which would help in tranmit the most confidential files safely and we have delivered with a software and a hardware idea	
Our software idea is ready to work in real time source and our hardware idea is ready but it's quite bit costly to make it to real life because we are using rsa algorithm and hsm drive module hsm module is quite costly so it is being pending but our idea is completed.
